
Cocoa farms
Activities
Impact drivers
・Conversion of primary forests, peatlands, mangroves, wetlands into farmlands
・GHG emissions
・Air pollution due to slash-and-burn agriculture and peatland development
・Water and soil pollution due to pesticide use and others
Dependency pathway
Impact pathway
External drivers of change
State of nature
・Primary forests
・Peatlands
・Mangroves
・Wetlands and others
Ecosystem services
・Soil and sediment retention to curb soil erosion
・Climate regulation
・Soil quality regulation (e.g. organic carbon density)
・Water purification
・Pollination
・Air filtration
