
CLMRS
(Child Labor Monitoring and Remediation System)
Set up and training
Set up CLMRS at community level and train community agents on child protection (household surveys; farm visits; follow-up of identified CL cases and potential cases of forced labor)
Community risk assessment
Conduct CL risk assessments in communities we are sourcing cocoa from
Household survey
Survey farming households and farmers to identify CL risks
Awareness raising & Prevention activities
Raise awareness at household level and implement preventative actions (e.g., supporting educational infrastructure, establishing Village Savings and Loans Associations, VSLAs)
Farm survey
Conduct unannounced farm visits
Set up remediation action plan
Set up remediation action plans and conduct individual (household level) or collective (community level) remediation activities
CL cases follow-up
Follow up of previously identified CL cases 6 months after remediation
